| B13                   | Adattatore di gonfiaggio                      | 1   | 1/4                |
| B14                   | Striscia reattiva                             | 1   | 1/4                |

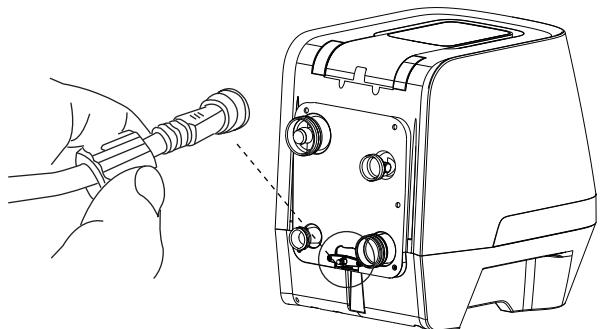

# INSTALLAZIONE

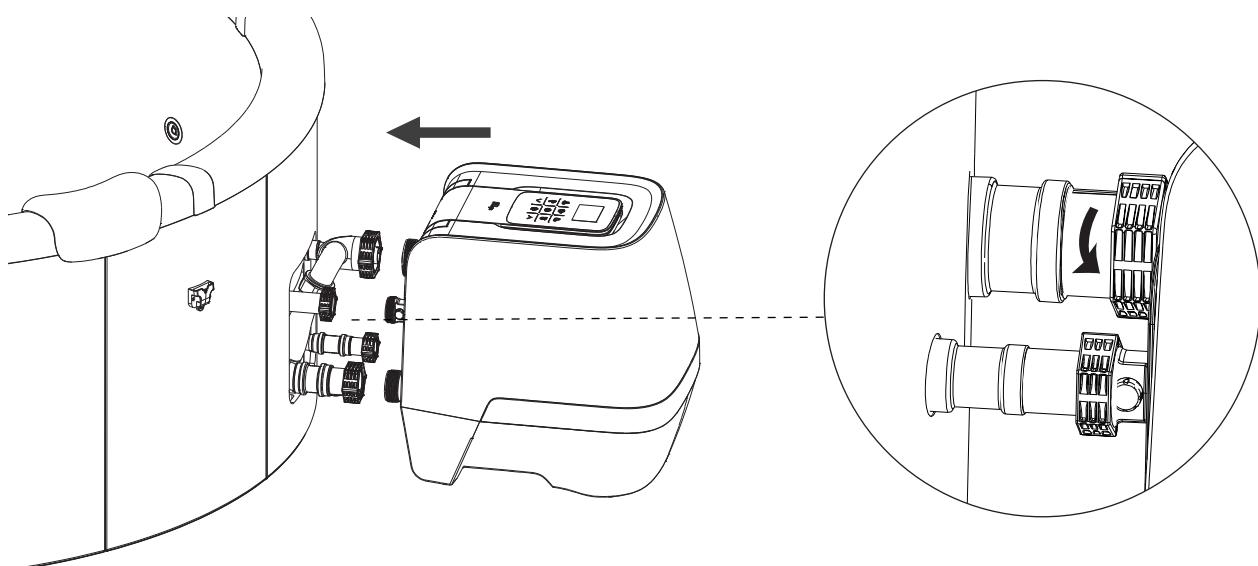

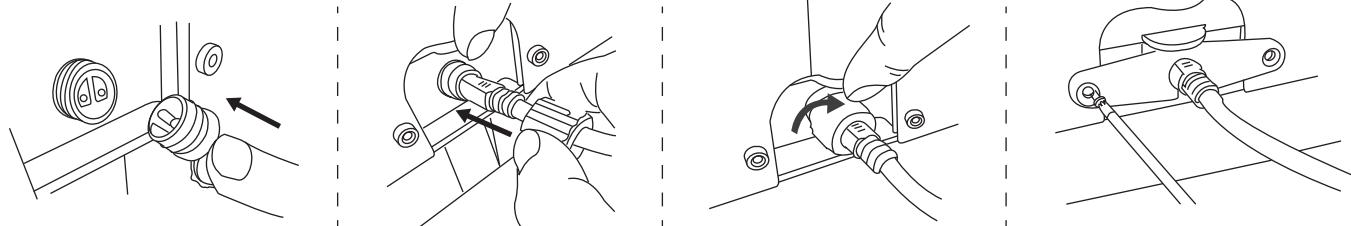

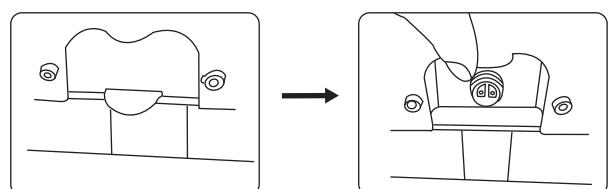

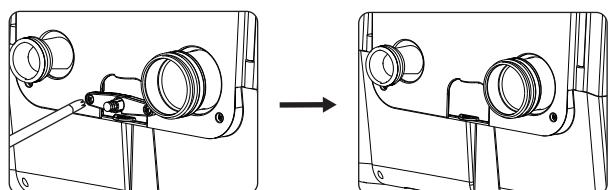

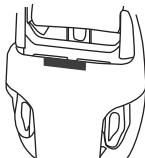

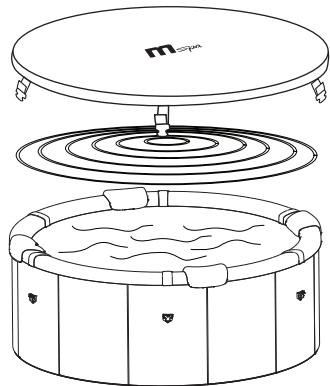

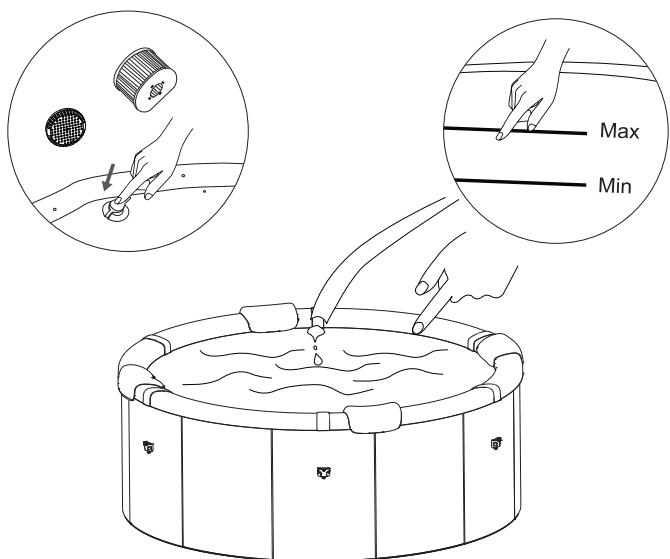

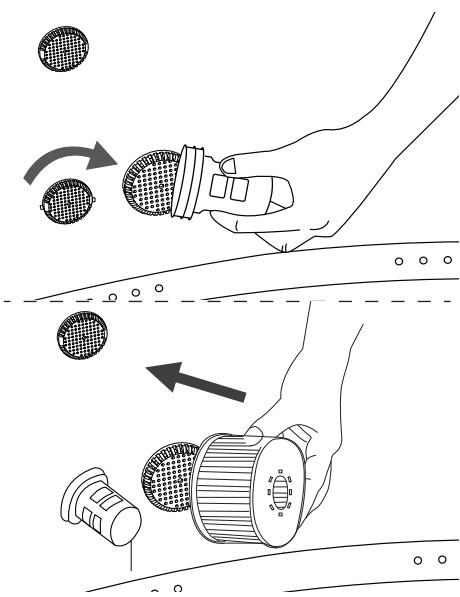

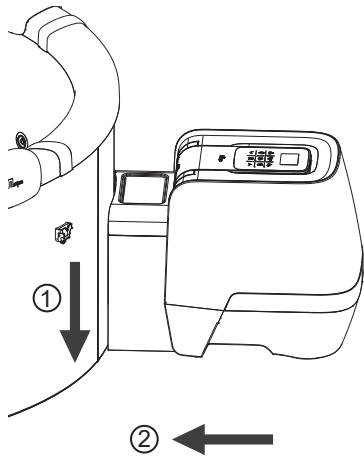

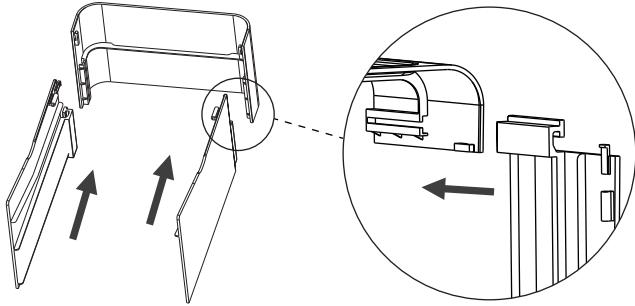

Tenere premuto il pulsante BUBBLE per più di 3 secondi per interrompere il gonfiaggio.

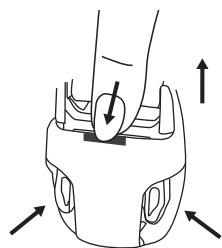

Collegare il cavo della striscia luminosa LED alla centralina di controllo.

**Blocco**

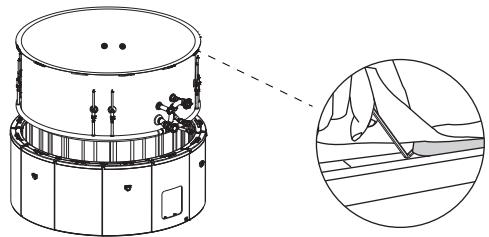

**Sblocca**

## SMONTAGGIO

### Istruzioni per lo Smontaggio

Rimuovere tutte le parti seguendo l'ordine inverso rispetto ai passaggi di installazione.

**NOTA:** Per rimuovere il rivestimento interno (liner), utilizzare una chiave a L per sollevare il blocco di fissaggio dallo slot del pannello laterale. Non trascinare direttamente il liner.

### Sgonfiaggio della Camera d'Aria della Spa

1. Aprire il tappo della valvola per sgonfiare la camera d'aria. Per uno sgonfiaggio rapido, inserire la cannuccia (inclusa nel kit di riparazione) nella valvola.
2. Una volta completato lo sgonfiaggio, rimettere il tappo.
